Module 1 Quiz

Latest Submission Grade **85.71%**

1. Which of the following is true about jQuery plugins? (Select all that apply.)

1 / 1 point

☒ They are one of the features that make learning jQuery worthwhile

✓ **Correct**
All of these are true about jQuery

☒ There are thousands of them available

✓ **Correct**
All of these are true about jQuery

☐ They are too difficult to use to be worthwhile

☒ They add additional functionality to jQuery

✓ **Correct**
All of these are true about jQuery

2. Which of these is not one of the five steps to get a larger plugin to work?

1 / 1 point

☒ Pay a fee to the plugin's developer

☐ Put the markup that the plugin expects on the page.

☐ Make sure jQuery is linked. Decide if you are going to put your scripts at the top or bottom of the page.

☐ Link the plugin file. There may be a compressed and uncompressed version. Use the compressed one.

☐ Initialize the setup of the plugin in your own script tag, or on your own linked JS file. Often you can set additional options when the function is initialized. Make sure this script loads last.

✓ **Correct**
This is true about jQuery.

3. Which of these are things you need to be careful about when loading a plugin? (Select all that apply.)

1 / 1 point

☒ Be sure to only have one copy of jQuery

✓ **Correct**
All of these are things to watch for.

☒ Be sure your CSS file loads last so that you can override styles

✓ **Correct**
All of these are things to watch for.

☒ Check to see if the plugin needs to be loaded on the top or the bottom of the page

✓ **Correct**
All of these are things to watch for.

☐ File management is handled automatically by the plugin, so it's not something you need to pay attention to.

4. Which of these are downsides to plugins? (Select all that apply.)

1 / 1 point

☒ They can add bloat to your project.

✓ **Correct**

All of these are potential downsides to using plugins.

- ☐ They always cost money to use.
- ☒ They can make your site look generic.

✓ **Correct**

All of these are potential downsides to using plugins.

- ☒ They can be poorly written.

✓ **Correct**

All of these are potential downsides to using plugins.

5. Which of these are reasons to use a minified version of plugins? (Select all that apply.)

1 / 1 point

- ☐ Minified files are easier to read.
- ☒ With the whitespace removed, they are smaller files.

✓ **Correct**

This is a reason to use minified versions.

- ☒ They tend to be optimized to run faster.

✓ **Correct**

This is a reason to use minified versions.

- ☐ It is easier to edit the code with a minified version.

6. If the plugin uses an older version of jQuery than the one you have, which should you use?

1 / 1 point

- ☐ Both versions so that your code and the plugin code will both work.
- ☒ The newer version, because it will be backwards-compatible so the plugin will still work.
- ☐ The older version because that is what was used to write the plugin.
- ☐ It doesn't really matter.

✓ **Correct**

Newer versions of jQuery can run older code, but the reverse is not true.

7. In what order do you need to link to your JavaScript files?

0 / 1 point

- ☒ Your script, plugin, jQuery
- ☐ Plugin, your script, jQuery
- ☐ jQuery, your script, plugin
- ☐ jQuery, plugin, your script

✗ **Incorrect**

Please revisit the lesson **Adding Markup & Hooking Up the Slider**.
