Module 1 Quiz

Latest Submission Grade **100%**

1. What are some things to consider before using jQuery? (Select all that apply.)

1 / 1 point

- ☐ jQuery is guaranteed to work the same on every browser.
- ☒ It adds weight to your pages.

If you want to get a simple interaction working quickly and easily, or you want to make use of a jQuery plugin, it may save you a lot of time.

- ☒ Pages will take longer to load.

If you want to get a simple interaction working quickly and easily, or you want to make use of a jQuery plugin, it may save you a lot of time.

- ☐ jQuery is always easier to use than other technologies like CSS animation.

2. Which of the following are ways to plug jQuery into your site? (Select all that apply.)

1 / 1 point

- ☐ Manually copy and paste the jQuery code into the head portion of your webpages.
- ☒ "Hot link" to a library on a content delivery network (CDN).

This works, but this course usually relies on linking to a CDN.

- ☒ Download the library into your project and link to the local file.

This works, but this course usually relies on linking to a CDN.

- ☐ Embed encrypted jQuery code into your web pages.

3. Which of the following is the correct jQuery object? (Select all that apply.)

1 / 1 point

- ☐ javascript()
- ☒ \$()

You can use this, but typing one character is always better than typing 6.

- ☒ jQuery()

You can use this, but typing one character is always better than typing 6.

- ☐ object()

4. What CSS property is used to initially hide a menu?

1 / 1 point

- ☒ display: none;
- ☐ display: off;
- ☐ display: hidden;
- ☐ menu: noshow;

You can use jQuery to toggle this to display:block to show the menu.

You can use jQuery to toggle this to display:block to show the menu.

5. What does parentNode do?

1 / 1 point

- ☒ Selects the element that is the parent of the currently referenced element.
- ☐ Selects the node immediately adjacent to the current node.
- ☐ Selects the most recently used node.
- ☐ Selects all of the parent and grandparent nodes.

✓ Correct

Often, you will need to access the parent of the current node in order to get your jQuery to work.

6. What jQuery helper function is the same as using the CSS function with the "display" property set to "none"?

1 / 1 point

- ☒ `.hide()` ;
- ☐ `.this("hide")` ;
- ☐ `.show("hide")` ;
- ☐ `.display("none")` ;

✓ Correct

The hide() function automatically sets the CSS display property to none.

7. Which of these shows the correct way to change the font size and color in jQuery? (Select all that apply.)

1 / 1 point

- ☒ `$("#main p").css("font-size", "24px").css("color", "red")` ;

✓ Correct

This is a correct method.

- ☐ `$("#main p").css("font-size:24px",).css("color:red")` ;

- ☐

```
for (var i = 0; i < parasToChange.length; i++) {  
    parasToChange[i].style.fontSize = "24px";  
    parasToChange[i].style.color = "red";  
}
```

- ☒ `$("#main p").css({ "font-size": "24px", "color": "red" })` ;

✓ Correct

This is a correct method.
